

AI Usage Report

Course: SMD

Assignment: 1

Student Name: Talha

Registration No.: 22i-2502

Date: 2-10-2026

1. AI Tool(s) Used

List the AI tools used during the development of your application.

Example: ChatGPT, Gemini, GitHub Copilot

Response:

Claude Code

2. Purpose of AI Usage

Explain what you used AI for during the development of your application.

Examples:

- Understanding React/React Native concepts
- Debugging errors
- Generating or improving UI ideas
- Implementing charts using react-native-chart-kit
- Understanding unfamiliar code
- Improving code structure

Response:

Majorly for the UI. I am familiar with the code, it was mostly for designing the app and the styles. Also the react-native-chart kit implementation.

3. Important Prompts Used

Provide the important prompts that you gave to the AI tool.

Prompt 1:

we have used basic react native components useeffect and fetch etc
no redux or other stuff

we have used states and usestate etc
any react native ui components are fine

also have to use hte library mentiond
but we will do it step by stpe and not as a one shot

my flex studentportla has the following information

we have hte following pages or dahsboards

Home

htis has the sutdents's roll no degree batch section campus status

acadmeic calendar

Registration: 14-Aug-2026 to 30-Aug-2026

Online Feedback #1: 14-Sep-2026 to 23-Sep-2026

Classes: 17-Aug-2026 to 11-Dec-2026

Online Feedback #2: Updated soon

Online Withdraw request: 22-Aug-2026 to 11-Dec-2026

Online Retake request: After Mid Exam / After Final Exam

Personal Information

personal information including Name dob gender email mobile no blood group nationality

Contact information which has an address
current and permanent th

then there is a course registration screen which shows courses and course codes and names and allow to choose from available sections and register

marks section which allow us to select a course showing the course code and name of the course and shows the marks for quiz assignments sessional 1, 2 and then the final exam and also semester project

similar for attendance where 80 percent minimum is the threshold and we measure in credit hours 1.6 credit hours per class present or absent or late absent marks as not here but present and late are similar

then we have a fee challan which just has a challan that generates an id and a per course breakdown charged by credit hours a normal course is 3 credit hours and a lab is 1 credit hour

let's only do these for now

(copied and pasted as is)

4. AI-Generated Output

Briefly describe the code, solution, or suggestion provided by the AI.

Response:

It split the app into components that were used across the board. A data directory which was doing what a data store like a database would be doing in an actual application. Made use of arrays of objects.

5. Changes Made by Me

Explain what you changed, modified, or improved in the AI-generated solution.

Response:

I did nothing manually. But I did have it correct the UI alongside making it so that it uses states for what screen to currently display and all. Guided it through each section step by step and what to use and where to store it, the components to make and all.

6. My Understanding

Explain the important part(s) of the AI-generated code in your **own words**.

Response:

The components probably. And then how states were made use of especially. Alongside the external library used for the charts.

7. Verification and Testing

Explain how you tested the AI-generated solution.

Mention:

- Whether the code worked correctly
- Errors encountered
- How you fixed the errors
- Any changes required after testing

Response:

There were multiple visual errors, text alignment and unreadable charts. No other errors were encountered.

8. Reflection

What did you learn from using AI during this assignment?

Response:

I did not learn anything much from AI. I do not like reading or writing javascript but I am familiar with it from my earlier semesters. The thing that I did learn and make use of was the expo go app which was seamless and I plan to use it later and move on to experimenting with mobile applications that would make daily lives and things easier. The use of expo go had nothing to do with AI though.

Student Declaration

I confirm that I have used AI tools only as a development assistant and that I understand the code submitted as part of this assignment. I am able to explain and demonstrate the functionality of my application.
